KeyMacro is an advanced utility for Windows that lets you save keyboard shortcut keystrokes in a registry-compatible format that can be used across multiple applications. KeyMacro also provides an additional interface, which you can use to change keyboard shortcut settings. Here are some of the features that set KeyMacro apart from other software:

- Automatically keeps track of all saved keyboard shortcut keystrokes, allowing you to retrieve all of them in a matter of seconds.
- Helps you to create a new keyboard shortcut by simply pasting a saved keyboard shortcut into the text box in the KeyMacro interface.
- Captures hot keys when any program is active (the program does not have to be active for KeyMacro to capture the hot key).
- Enables you to easily edit or modify a saved hot key.
- Provides features for changing keyboard layout or installing and using a custom keystroke modifier.
- Works with popular shortcuts like Alt+D, Ctrl+L, or F10.
- Works with shortcuts that have been saved by using the Windows hot keys.
- Can capture hot keys from command prompt, or from desktop shortcuts.
- Works for any Windows applications that support hot keys.
- Supports multi-level, multi-user/multi-computer, roaming profiles, and Windows registry backup compatibility. This software also supports:
- Saving hot keys as "proxy" keys that can be used on other computers.
- Saving hot keys for all the programs installed on a computer.
- Capturing hot keys from all active processes in a computer.
- Multi-level profiles.
- Emailing hot keys, and storing hot keys in a public registry so that users can use them, on a web site, on an intranet, or on a web-based application.
- Creating a public website for hot keys.
