Time-resolved X-ray diffraction as a probe of nanoscale chemical kinetics of L-cysteine adsorbed onto nano-TiO<sub>2</sub>: evidence for nucleophilic attack and subsequent condensation reactions. The self-assembly of L-cysteine (L-Cys) monolayer and multilayer on nano-TiO(2) particles was studied by time-resolved X-ray diffraction (TXRD). The results demonstrate that L-Cys monolayer on TiO(2) nanoparticles is sensitive to pH, suggesting the presence of a weak electrostatic interaction between L-Cys and TiO(2) nanoparticles. Evidence of condensation reactions between L-Cys and TiO(2) was also obtained, as confirmed by TXRD. Time-resolved diffraction results were analyzed to provide information on the adsorption kinetics, reaction mechanisms, and specific reaction sites on the nanoparticle surface. KEYMACRO-An OEM ANSI converter for Windows XP. A great solution for changing the ANSI coding in text files. KEYMACRO supports the OEM coding standard used in MS DOS, WINDOWS and in WordPerfect. It can export documents to other text files with different ANSI coding. The original operating system settings have been saved in the keymapp file and are preserved during the conversion. The setup was compiled with the DOSBox emulator. Therefore the conversion only works with DOSBox. Fast game editor allows to edit the positions and speeds of the moveable objects on the game map. When editing is over, you can save your changes or just open the game map file and set the settings there, without creating a new map. The game map editor is fully configurable - you can set the length of the map, number of objects and so on. And you can set up multi-player maps with different types of players. There is a built-in help system. PC TRAK is a travel guide for your MS Windows computer. It allows you to track your computer and to store location data and route maps for yourself. PC TRAK will track the computer on its own. You can also use other PC TRAK software to generate computer routes. If you do not use a GPS navigator, PC TRAK is also a good tool for driving directions. This is a graphical web tool that is designed to help the map collector. It features a graphical map-viewer and a map-editor. The map can be viewed in real-time and the map can be edited by dragging with the mouse. The map-editor can be used to change, for example, the colors and attributes of the map. Vatican City itself was famous for the cockroaches. This year, the roaches are gone, swept away as part of the Vatican's anti-vampire campaign.
